Learning Outcomes

After successful completion of L10 Open Standards students will be able to

- facilitate open standards.

Standard-first

- start with user or dev-facing docu (man pages, ...)
- think of alternative implementations from the beginning
- don't be afraid to also decide (sizes, data structure)
e.g. for portability and performance

Levels of Standardisation

- Filesystem or file content
- Network protocol
- APIs and ABIs
- screen content

KISS, several reference implementations

Compatibility

- users want to rely on standards
- should have same meaning for the life-time of the standard

Testing

- does an implementation comply to an standard?
- e.g. HTML, documents: is the rendering result the same

Examples

- POSIX
- SANE
- gstreamer
- Elektra
- D-Bus
- Freedesktop.org
